

MERXET

End-to-End Encrypted Retail Protocol
Non-custodial, escrow-based shopping on Hedera

Scan products. Save them to your cart. Pay when ready.
Retail without POS terminals, banks, or marketplaces.

Better than Shopify
Built for the **Hedera ecosystem.**

The Problem

Retail today depends on intermediaries.

Sellers must rely on

- Banks
- Payment processors
- POS terminals
- Marketplaces

It creates major problems

- High transaction fees
- Frozen balances and delayed withdrawals
- Complex setup for small sellers
- Billions of people excluded from commerce

Retail infrastructure has barely changed in decades.

Physical retail is

\$30+

trillion market.

The Opportunity

But millions of sellers still cannot easily accept digital payments.

Examples: street vendors, small shops, pop-up markets, independent brands, sellers in emerging markets

What they need:

A simple, global checkout system.

No terminals. No banks. No complex setup.

Introducing Merxet

Merxet is an end-to-end encrypted retail protocol built on Hedera.

It allows sellers to:

- create product catalogues
- publish products via QR codes
- receive orders
- get paid directly to their wallet

How It Works

SELLERS start instantly.

Setup takes minutes

No hardware

No installation fees

[1]

Create a catalog

[2]

Generate QR codes for
products

[3]

Place QR codes
next to items

[4]

Receive orders

[5]

Get paid directly on Hedera

How It Works

FOR BUYERS shopping is easy

No apps required

No accounts required

Just scan → save → pay → wait for delivery.

[1]

Scan a product QR code

[2]

The product is saved
to cart

[3]

The cart persists
over time

[4]

Pay when ready

[5]

Receive delivery

End-to-End Encrypted Orders

Merxet protects buyer and seller privacy. Order details are end-to-end encrypted.

This means ●

- only the buyer and seller can read the order
- the platform cannot access customer data
- no resale of personal information

Why Hedera

Merxet is powered by Hedera network services.

HEDERA CONSENSUS SERVICE

- timestamp encrypted orders
- immutable order verification

HEDERA TOKEN SERVICE

- payment settlement
- stablecoin support

HIP-551 BATCH TRANSACTIONS

- simplified wallet UX
- lower transaction overhead

Key Innovations

Merxet creates decentralized retail infrastructure.

1

QR-First Commerce

Every product becomes a checkout point.

2

Encrypted Orders

Commerce without data harvesting.

3

Universal Cart

Buyers can scan items and pay later.

4

Wallet-Native Payments

Funds settle directly between buyer and seller.

Business Model & Go-To-Market

Merxet is simple for sellers. Instant start. No setup fees.

REVENUE MODEL **1%**

fee per completed order

GO-TO-MARKET STRATEGY

- small retailers and pop-up shops
- emerging markets with limited banking access
- crypto-friendly merchants
- local marketplaces and events
